Projects

- **Title: HOTEL MANAGEMENT**

Technologies: Java, Servlet, JDBC, HTML, CSS, JavaScript, Jsp, Oracle Database

Description:

Developed a Hotel Management System utilizing Java, JSP, Servlet, JDBC, HTML, CSS, JavaScript, and Oracle Database. This project facilitates efficient management of hotel operations, enabling users to view available rooms with pricing details, make room reservations, and receive detailed invoice bills via email. Implemented features to calculate total invoice bills in real-time during the booking process, enhancing user experience and streamlining hotel management processes.

- **Title: PRODUCT MANAGEMENT SYSTEM**

Technologies: Spring MVC, Thymeleaf, Lombok, Spring Data JPA, Oracle Database

Description:

Led the development of a robust Product Management System leveraging Spring MVC and Thymeleaf technologies. Engineered to execute seamless CRUD (Create, Read, Update, Delete) operations on product data, the project showcases proficiency in integrating advanced tools such as Lombok, Spring Data JPA, and Oracle Database. This endeavor highlights both technical acumen and a keen focus on delivering efficient solutions in product management.
